

GLOBAL LNG SERVICE

Everything you need to monitor, understand and respond to the global LNG market.

The Global LNG Service provides news, analysis, data and insight on near-term global LNG market dynamics by leveraging Energy Intelligence's **primary sources** and editorial reach.

By obtaining **original market insight**, our experts provide you with the **context and analysis** to answer the "so what" and "what next" questions for a rapidly evolving industry.

THE DELIVERABLES

	DAILY NEWS Concise, expert review of major news items to help you navigate the rapidly evolving marketplace
	WEEKLY ANALYSIS Independent analysis on critical commercial, economic and political developments affecting the global LNG industry
	DATA Proprietary spot LNG assessments, North America and Europe hub pricing, Asian LNG import volumes and prices, spot LNG exporter netbacks at key markets and spot versus term cost comparison
	ANALYTICAL REPORTS 20 monthly, quarterly and semiannual outlooks, benchmarking reports and strategic assessments

THE BENEFITS

- Make better trading decisions** using near-term news and analysis (0-3 month window) to respond profitably to an increasingly liquid LNG market.
- Monitor and respond to partner and competitor movements** (3-18 month window) by leveraging our analytical assessments, data benchmarks and supply, demand and price forecasts.
- Support your corporate strategic planning** with our medium-term macro outlooks, scenarios and strategic trends (18-60 month window).
- Capture emerging market opportunities** using independent medium-term supply-demand outlooks.
- Negotiate better LNG contracts** using proprietary term and spot price forecasts supported by a robust methodology.
- Stress-test in-house assumptions** with out-of-the-bubble thinking from our strategic trend outlooks.
- Tackle your unique business challenges** with the help of our experts who are on hand to deliver tailored in-person briefings and live Q&As.

WHO SHOULD USE THIS SERVICE?

This comprehensive service is an indispensable tool for senior executives in strategy and supply planning, business development, government relations, and origination in all companies with exposure to the global LNG market.
